AUDITORS' REPORT TO METHODMODEL LIMITED

UNDER SECTION 247B OF THE COMPANIES ACT 1985

Basis of Opinion

We conducted our audit in accordance with Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the accounts. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the accounts, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the accounts are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of the information in the accounts.

Opinion

In our opinion the accounts give a true and fair view of the state of the company's affairs as at 30th June 1999 and of its profit for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

NOTES TO THE ABBREVIATED ACCOUNTS

FOR THE YEAR ENDED 30TH JUNE 1999

1 Accounting Policies

Basis of Accounting

The Accounts have been prepared under the historical cost convention.

Turnover

Turnover is the total amount receivable by the company for goods supplied and services provided, excluding VAT and trade discounts.

Depreciation

Depreciation is calculated to write down the cost or valuation to its estimated residual value of all tangible fixed assets other than freehold land by equal annual instalments over their expected useful lives. The rates and periods generally applicable are:

Plant and machinery	15 %
Motor vehicles	25 %

Research and development expenditure is charged to profits in the period in which it is incurred.

Stocks

Stock and work in progress have been valued by the directors at the lower of cost or net realisable value.

Deferred Taxation

Deferred tax is provided for under the liability method using the tax rates estimated to arise when the timing differences reverse and is accounted for to the extent that it is probable that a liability or asset will crystallise except to the extent that, in the opinion of the directors, there is reasonable probability that the liability will not arise in the foreseeable future.

Leased Assets

Assets held under finance leases and hire purchase contracts are capitalised in the Balance Sheet and depreciated over their expected useful lives. The interest element of leasing payments represents a constant proportion of the capital balance outstanding and is charged to the Profit and Loss Account over the period of the lease.

All other leases are regarded as operating leases and the payments made under them are charged to the Profit and Loss Account on a straight line basis over the lease term.
